PROFILE

Audio producer and engineer with 7+ years of practical experience across music production, recording, mixing, mastering, sound design and studio session work. BA (Hons) graduate in Electronic Music Production, experienced in taking projects from initial concept and recording through editing, mixing and final delivery. Confident using macOS and Windows, with strong digital file-management habits and an organised approach to audio assets and project sessions. Combines practical musical knowledge with reliable project management, problem-solving and delivery to deadlines. Interested in music production, studio recording, audio post-production, sound design, music archives and wider creative audio roles.

CORE SKILLS

Recording & Studio: Vocal and instrumental recording; microphone setup and placement; gain staging and signal flow; punch-in recording and vocal comping; session setup, file management and delivery; digital and analogue recording workflows; tracking electric guitar using analogue studio equipment.

Music Production: Beat production across multiple genres; arrangement and creative direction; drum programming and rhythm design; MIDI programming and sequencing; synth programming and sound design; vocal production.

Mixing & Post-Production: Mixing and mastering; EQ, compression, reverb, delay and creative processing; audio editing and cleanup; Foley recording and editing; sound effects and audio redesign; dialogue, music and effects balancing for visual media.

Software & IT: Logic Pro X — primary DAW; FL Studio — working knowledge; Waves plugins; MetaTune / AutoTune; Logic stock plugins and processing tools; confident using macOS and Windows; comfortable learning new software and technical systems.

Musical Skills: Confident keyboard / MIDI performance; able to identify musical keys using keyboard and music-theory knowledge, and determine BPM / tempo; practical understanding of rhythm, arrangement and instrumentation across multiple genres. Piano, guitar and drums skills continuing to develop.

Digital Organisation & Workflow: Maintain clearly labelled, structured folders and organised music-project files, audio exports and session materials. Strong attention to detail in file naming, version management, asset retrieval and final delivery.

Project Management: Organise workload, prioritise tasks and deliver creative projects to deadlines; work independently, troubleshoot production-workflow issues and follow tasks through to completion.

PROFESSIONAL EXPERIENCE

Freelance Music Producer & Studio Engineer | 2018 – Present

- Produce, record, mix and master music for independent artists across multiple genres.
- Run recording sessions from studio setup through tracking, editing, mixing and final delivery.
- Record vocals and instrumental parts, including session preparation, microphone setup and gain staging.
- Direct artists during recording, including punch-ins, performance coaching and creative decision-making.
- Develop arrangements and production ideas in collaboration with artists.
- Maintain organised session files and deliver final mixes and masters suitable for release.
- Build ongoing working relationships with artists across repeat projects; manage client communication, bookings and project delivery.
- Produce and license original beats through BeatStars, YouTube and direct studio work; created a catalogue of 2,000+ original beats and instrumentals.

Studio Session Experience | Ongoing

- Independent recording sessions typically ranging from 2–8 hours.
- Practical experience tracking electric guitar using 1980s-era analogue recording equipment.
- Experience working across digital DAW-based production alongside analogue recording approaches.
- Practical understanding of session workflow, recording chains, monitoring and file organisation.

Game Audio & Sound Design | Academic / Project Experience

- Designed and produced original audio to meet detailed creative briefs.
- Recorded, edited and layered Foley to create realistic and immersive audio for visual media.
- Produced complete audio redesigns for gameplay footage, replacing dialogue, sound effects and environmental audio.
- Created original sound effects using field recordings, Foley techniques, synthesis and digital processing.
- Mixed and mastered audio to balance dialogue, music and sound effects into cohesive final products.

IMMERSIVE AUDIO & DOLBY ATMOS PRODUCTION

Completed a full Dolby Atmos mixing project using Dolby Atmos Renderer and DAW-based object-oriented spatial placement.
Developed practical experience in immersive audio workflows, spatial positioning and multichannel mixing, applying technical and creative production techniques to deliver an immersive listening experience.

- Worked to deadlines through research, experimentation, iteration and feedback; developed an understanding of how sound supports gameplay, atmosphere and storytelling.

SELECTED WORK & INDUSTRY ACTIVITY

- Jawbreaker — CMQ (2021): beat production credit released on streaming platforms.
- Production and engineering contributions across EP and album-development sessions.
- Collaboration with 10+ independent artists across recording, production and project development.

EDUCATION

- BA (Hons) Electronic Music Production — dBs Institute, Bristol — May 2026
- Level 3 BTEC Music Production — Hereford & Ludlow College
- GCSEs — including Maths and English

ADDITIONAL INFORMATION

- Full UK driving licence
- Own transport
- Available for studio sessions, freelance work and wider audio opportunities
